

Course TY03028: Wild Animal Disease

1. General information

- Term: 7
- Credits: 2 (**Theory 1 – Practice, Practice 1 – Self-study 6**)
- Credit hours for learning activities
 - + Learning theory in class: 22 hours
 - + Practice: 8 periods (x 2 = 16 actual lessons)
- Self-study: 90 hours
- Department conducting the course:
 - Department: Veterinary Anatomy, Histology and Embryology
 - Faculty: Veterinary Medicine
- Kind of the course:

Foundation ☐		Fundamental ☐		Option 1 ☐		Option 2 ☐	
Compulsory	Elective	Compulsory	Elective	Compulsory	Elective	Compulsory	Elective
☐	☐	☐	☐	☐	☐	☐	x

- Prerequisites: TY02020 Veterinary Pathology 1; TY02011 Veterinary Pathology 2
- Teaching language: Vietnamese

2. Course objectives and expected learning outcomes

* *Course objectives*

- Knowledge: Course provided for students with knowledge in wildlife conservation, common diseases on different animal groups and some basic prevention measures
- Skills: Course provide students with skills in wildlife conservation, common diseases on different animal groups and some basic prevention measures
- Attitude: Course provide students with attitudes in protecting the environment, improve human health and show love for animals.

* *Course expected learning outcomes*

Notation	Course expected learning outcomes (CLOs) After successfully completing this course, students are able to	Program performance criteria (PPC)
Knowledge		
CLO2 : Applying veterinary knowledge to the prevention of animal diseases effectively .	Design disease prevention programs for animals. Implement disease prevention programs for animals	2.2; 2.3
CLO4 : Design programs for diagnosis and treatment of diseases for livestock, procedures for disease prevention for animals according to prescribed standards.	Design diagnostic and treatment programs for livestock diseases	4.1
Skills		
CDR11 : Scientific research that successfully solves problems in the field of veterinary medicine.	Research problem discovery	11.1

Notation	Course expected learning outcomes (CLOs) After successfully completing this course, students are able to	Program performance criteria (PPC)
Attitude		
CDR13: Carry out responsibilities protect the environment, improve human health and show love for animals.	Take responsibility for protecting the environment and improving human health through veterinary work	13.1

3. Course description

The course aims to provide basic knowledge about the one health approach to wildlife disease management and the role of wildlife in disease management, wildlife care, feeding and management, wildlife conservation, and diseases common in wildlife of the reptile class; birds and mammals. Help students understand the responsibility and role of a veterinarian in conserving wildlife, as well as preventing diseases that are likely to spread from wild animals to humans, and create good habits. meticulous, loving animals as well as independent and team working habits.

4. Teaching and learning & assessment methods

KQHTMD	K1	K2	K3	K4	K5
PPGD					
Present	x				
Practice		x	x	x	x
Case studies		x	x		
Assessment					
Rubric 1. Attendance (10%)					x
Rubric 2. Practice (30%)	x	x	x	x	x
Rubric 4. Final exam (60%)	x				

5. Student tasks

- Attendance: All students must attend all classes
- Preparation for the lecture: All students must read the lecture notes before coming to class all classes
- Assignment: All students must do assignments
- Final exam: All students must take the final exam

6. Text books and references

* *Text Books/Lecture Notes:*

Nguyen Ba Tiep (2017). Lecture on Wildlife Diseases

* *Additional references:*

3. Wildlife Medicine and Rehabilitation: Self-Assessment Color Review . Anna L. Meredith and Emma J. Keeble. Manson Publishing Ltd. The Veterinary Press 2011

7. Course outline

Week	Content	Course expected learning outcomes
1	Chapter 1: One health approach in wildlife disease management and the role of wildlife (3 hours)	
	A/ Main content in class (3 hours) 1.1. Basics of a SK 1.2 The concept of wildlife and wildlife diseases 1.3. The role of educators B/ Self-study contents (9 hours) The concept of wildlife and one health	CLO1, CLO2
2	Chapter 2: Caring for, nurturing and managing wildlife (3 hours)	
	A/ Main content in class (3 hours) 2.1. Living environment, behavior 2.2. Foster care and management B/ Self-study contents (9 hours) Behavior, care, and nurturing of wild animals	CLO3, CLO5, CLO6
3	Chapter 3. Wildlife conservation (3 hours)	
	A/ Main content in class (3 hours) 3.1 Concepts 3.2. The role of conservation 3.3. Current status and solutions: Conservation of the natural environment; conservation of wildlife in natural and captive conditions (animal welfare, enrichment...) ; people 's behavior _ _ B/ Self-study contents (9 hours) Wildlife conservation	CLO3, CLO4, CLO5, CLO6
4	Chapter 4 . Diseases of some wild animals of the reptilian class (4 hours) A/ Main content in class (4 hours) 4. 1. Sepsis 4.2 . Bacterial disease 4.3. Canker sores due to infection 4.4. Ulcerative skin disease or necrotizing dermatitis B/ Self-study contents (12 hours)	CLO3, CLO4, CLO5, CLO6

	Abscess, Pneumonia, fungal diseases, environmental diseases and injuries, diseases caused by metabolic and endocrine disorders	
5	Chapter 5 . Diseases of some wild animals of the bird class (3 hours) A/ Main content in class (3 hours) 5.1. Flu 5.2. Newcastle disease 5.3. Mycoplasmosis 5.4. Pasteurellosis B/ Self-study contents (9 hours) Parasitic diseases in wild animals	CLO3, CLO4, CLO5, CLO6
5	Chapter 6 . Diseases of some wild animals of the mammal class (3 hours) A/ Main content in class (3 hours) 6.1. Infectious diseases 6.2. Non-communicable diseases B/ Self-study contents (9 hours) Infectious and non-communicable diseases of wild animals	CLO3, CLO4, CLO5, CLO6
6	Chapter 7: One health approach to managing wildlife pathogens (3 hours) A/ Main content in class (3 hours) 7.1. Question 7.2. What is a health? 7.3. The process of developing a health 7.4. The trend of approaching one health in the future 7.5. One health and disease of wild animals B/ Self-study contents (9 hours) One health and disease of wild animals	CLO1, CLO2
7-8	Practice (4 hours)	CLO5, CLO6
9-10	Fieldwork (4 periods)
